

Furhan Hussain | @furhanhussain |
furhan@bytesforall.pk, furhan.hussain@gmail.com

Furhan Hussain is a Karachi-Islamabad based human rights activist, digital security trainer, researcher, and communications professional. He currently leads digital security and advocacy at Bytes for All, Pakistan, with focus on freedom of expression, privacy rights and surveillance, censorship and information controls, and technology driven gender based violence.

His organization, Bytes for All, has played a vital role in leading the free speech and digital rights debate in Pakistan since 2007, and has been advocating for restoration of Internet rights in Pakistan on all major national and international forums.

Faheem Zafar | faheem@bytesforall.pk

Faheem Zafar is a Lahore based policy researcher and digital rights activist. Currently he is working with Bytes for All Pakistan as Manager Research and Digital Security Program. His areas of focus include monitoring of ICTs focused human rights violations, online privacy rights, digital security, Internet Freedom and e-governance.

Faheem has worked on numerous digital rights projects, and has contributed to a number of notable publications relating to freedom of expression, privacy rights, digital security of journalists and activists, and access to information. He has also contributed to 'Freedom On the Net' report from Pakistan, Global Information Society Watch Pakistan Country Report, Universal Periodic Review (UPR) on internet and human rights in Pakistan, and IDRC's research on Open eGovernance.

Managing the digital security program for Bytes for All, Pakistan since 2013, Faheem works closely with human rights defenders and journalists, and his responsibilities include team management, curriculum design, and delivery and evaluation of trainings.
